Ladies and Gentlemen:

Subject: Notice in accordance with Section 8(e): Results of a chronic study (21 days) in *Daphnia magna* on the experimental fungicide Substituted Nitrogen Containing Heterocycle

BASF Corporation is submitting results of a chronic study (21 days) in *Daphnia magna* on the experimental fungicide Substituted Nitrogen Containing Heterocycle. The test was conducted in accordance with the following international guidelines: OECD 211 *Daphnia magna* Reproduction Test (September 1988) and OPPTS 850.1300.

Results:

EC 50 (21 days) = >0.081 mg/l

Although the findings are not considered to present a substantial risk to human health or the environment, BASF Corporation understands that reporting of results from this study under TSCA 8(e) is in accordance with EPA's policy. Please note that a sanitized version of this letter is enclosed, treating the chemical identity and CASRN as confidential business information. The information considered confidential is highlighted, in accordance with U.S. EPA policy. The non-confidential chemical name is referred to as "Substituted Nitrogen Containing Heterocycle" and a confidentiality substantiation letter is enclosed.

Very truly yours,

BASF CORPORATION
